Alaskans rely on trails for recreation, subsistence, and travel between communities. These trails need maintenance to ensure safe passage and to ensure that they remain open and available for use. Funds are distributed by 90-10 matching grants for recreational trail and trailhead development and maintenance, and for education programs relating to trail safety and environmental protection. Grants are awarded to organizations, agencies and local governments.

Project Description/Justification:

As more and more residents and visitors turn to Alaska's vast trail system for recreation, subsistence and basic transportation between communities, the need for a more extensive and well-maintained trail system continues to grow. The growing population is also putting development pressure on the existing trail system and many trails are being lost as property is subdivided or sold to private owners. We can assist in slowing the loss of our existing trail system through this granting program and will sustain and improve that system as well.

State funds are saved by the availability of these federal grant funds for development and maintenance of Alaska's public recreational trails. Public safety is improved by having well maintained trails. Trespass is reduced by securing trail easements with grant funds. Search and rescue costs are reduced by having well marked and maintained trails that are easy to follow. Because this is a matching grant program, grantees provide cash, labor and equipment to match at least 10-20 percent of grant funds, effectively stretching state funds. Public recreational trails contribute to Alaska's economy by providing construction and maintenance jobs, attracting tourists and visitors, and by stimulating the business of outfitters, guides and tour companies. In addition, the Recreational Trails Program ensures that:

- Grantees obtain legal access
- Projects are consistent with Federal, State and local land use plans
- Social and economic impacts are analyzed
- Archeological and historical resources are protected
- The project is analyzed for any impact on threatened or endangered species
- The project is analyzed for any impact on fish and wildlife
- The project is analyzed for its affect on wetlands, flood plains and bodies of water
- Water quality is maintained
- Hazardous waste is checked for and identified
- Air quality is checked
- The noise resulting from the project is analyzed
- There is public involvement

Why is this Project Needed Now?:

Alaska's trails are gradually being lost due to community expansion and development pressure. The grant program provides an opportunity to establish new trails and reserve existing recreational access throughout the state.
